

Take this outside and look at your own lot.

Every figure below is from the 2010 ADA Standards for Accessible Design, sections 208 and 502. Count your total spaces first. That number is what decides everything in the table.

1. How many accessible spaces your lot has to have

TOTAL SPACES IN THE LOT	MINIMUM ACCESSIBLE	OF THOSE, VAN
1 to 25	1	1
26 to 50	2	1
51 to 75	3	1
76 to 100	4	1
101 to 150	5	1
151 to 200	6	1
201 to 300	7	2
301 to 400	8	2
401 to 500	9	2
501 to 1000	2% of the total	1 of every 6
1001 and over	20, plus 1 per 100 over 1000	1 of every 6

One of every six accessible spaces, or fraction of six, has to be van accessible.

Count each parking facility on its own. Two separate lots on one site are counted separately, not added together.

2. Then walk it, in this order

■ Stall width

A car accessible space is at least 96 inches wide. A van accessible space is at least 132 inches wide, or 96 inches wide if its access aisle is also 96 inches.

■ The access aisle

At least 60 inches wide, running the full length of the space it serves, and marked so nobody reads it as a parking space. Two spaces may share one aisle.

■ Slope

No steeper than 1:48 in any direction, across the space and the aisle both. This is the one that catches lots that passed years ago: asphalt settles.

■ Signage

Each space is marked with the International Symbol of Accessibility on a sign, with the bottom edge at least 60 inches above the ground. Van spaces say van accessible.

■ The route to the door

Accessible spaces sit on the shortest accessible route to an accessible entrance. The route runs no steeper than 1:20 unless it is a ramp, with cross slope no steeper than 1:48, and it does not make anyone travel behind parked cars.

■ Count it again after a restripe

Adding spaces changes what the table requires. A lot that gains stalls in a restripe can cross a threshold and come up a space short without anyone noticing.

3. Write it down while you are standing there

If the counted number is under the required number, that gap is the job. Text the photo and these figures and you get a number back.

Total spaces I counted	_____	Accessible spaces I counted	_____
Accessible the table requires	_____	Van spaces I counted	_____
Van spaces the table requires	_____	Signs missing or too low	_____

Not sure what you are looking at? Send a photo of the lot and the address.

Call or text (316) 617-0352. Kleen Stripe, striping Wichita lots since 1979.

A walk-around, not a legal audit. Figures are from the 2010 ADA Standards for Accessible Design, sections 208 and 502. Older lots may have different obligations.
